***Examiner's Amendment***

***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because in Figures 2 and 3 reference characters "10" and "20" have both been used to designate "upper frame" and "lower rear panel" and are reversed from Fig. 2 to Fig. 3; "41" and "42" have both been used to designate "hexagonal nut" and "screw" and are reversed from Fig. 2 to Fig. 3. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Allowable Subject Matter***

2. The following is a statement of reasons for the indication of allowable subject matter: the overall structure of the apparatus as recited in independent claim 1, and at least in part, because claim 1 recites a "CPU", "motherboard", "upper frame", "lower rear frame", "four expanding nail assemblies" and "two positioning screws". The aforementioned limitations in combination with all remaining limitations of the respective

claims are believed to render said independent claim 1 and all claims dependent therefrom patentable over art of record.

The closest references to the present invention are believed to be as follows: Szu et al. (US 6,560,112) teaches a fan stand structure (Figs. 3 and 4) which comprise a "CPU", "motherboard", "upper frame", "lower rear frame", "four expanding nail assemblies" is close to the arrangement claimed but lacks the screws and nuts. Ma (US 6,791,847) and Tucker et al. (US 6,392,977) teach fan stand structures which comprise a "CPU", "motherboard", "upper frame", "lower rear frame", "screws" are close to the arrangement claimed but lacks the nail assemblies and nuts. Yoneyama et al. (US 6,449,154), Ito (US 6,560,111) and Liu (US 2004/0052055) teach fan stand structures which comprise a "CPU", "motherboard", "upper frame", "lower rear frame" are close to the arrangement claimed but lacks the nail assemblies, screws and nuts. Szu (US 6,280,116) teaches a "nail assembly" to retain components through a circuit board but lacks the balance of the structure.

### ***Conclusion***

This application is in condition for allowance except for the following formal matters: drawings and claims.

No amendment affecting the scope of the claims is allowed. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

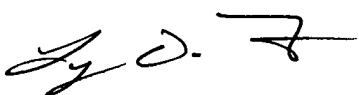

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
